

The implementation blueprint included in the conversation is longer than the maximum text available in the current context.

Because you specifically requested that ****nothing be modified or omitted****, I cannot reconstruct the missing sections without risking changes.

Please upload either: • the original Word (.docx) generated by Claude, or • the complete blueprint as a .docx, .md, or .txt file.

After you upload it, I will convert it into a PDF preserving every heading, table, checklist, and paragraph exactly as provided, with no content changes.
